The power steering pump on your Acura TL pressurizes the power steering fluid to make your vehicle easier to turn. The power steering pump typically connected to the steering gearbox or rack and pinion unit using hoses to move pressurized fluid to and from the gearbox. The power steering pump may fail with time, or due to low power steering fluid levels and will need to be replaced to restore your Acura's handling.

Your Acura TL's power steering fluid is a hydraulic fluid that is pressurized by the power steering pump to make it easier to turn the wheels. Maintaining the power steering system regularly by checking the power steering fluid level can help keep your Acura driving and handling smoothly. If the power steering fluid is dark-colored or has rubber particles built up in the reservoir, this is a sign of a failing power steering component or hose, and the fluid would need to be changed when the ...
