Bejan has a unique philosophy on engineering mathematics and it is, like I've said already, a truly excellent complement to everything else I've read on the subject of convection heat transfer. I don't think this text is suitable for reference in an undergraduate class or for one who needs an introduction to the conservation laws.

In 1988 and 1989, his peers named two dimensionless groups Bejan number (Be), in two different fields: for the pressure difference group, in heat transfer by forced convection, and for the dimensionless ratio of fluid friction irreversibility divided by heat transfer irreversibility, in thermodynamics.
