Module Goal: The students will review the key actions and events during the Salt Fire incident and identify the critical decision points during the incident.

Instructor Guide - Salt Fire Case Study

Abstract. Reliance on community health workers (CHWs) for HIV care continues to increase, particularly in resource-limited settings. CHWs can improve HIV service use and adherence to treatment, but effectiveness of these programmes relies on providing an enabling work environment for CHWs, including reasonable workload, supportive supervision and adequate training and supplies.
