An Introduction to Combustion - Stephen Turns - Ebook Center

This Second Edition retains all the same primary objectives as the original text: First, to present basic combustion concepts using relatively simple and easy-to -understand analyses; and second, to introduce a wide variety of practical applications which motivate or relate to the various theoretical concepts. The overarching goal is to provide a textbook which is useful for both formal ...

An Introduction to Combustion: Concepts and Applications ...

Combustion is the burning of some kind of fuel — whether it’s natural gas, propane, oil, coal, or wood — to produce usable heat or energy. This energy, in turn, transfers, at first, to a device like a heat exchanger. The exception would be when the flames and gases of combustion make direct contact with whatever needs to be heated.
