How to Change Automatic Transmission Fluid in a Nissan Altima. Drain the Old Transmission Fluid and Filter. Park the car on level ground. Raise and level it securely with ramps or jacks. Remove the filler dipstick from beneath the hood and replace it with a funnel. Place a drain pan beneath the transmission fluid pan.

### How to Change Automatic Transmission Fluid in Nissan Cars ...

Nissan transmissions tend to run hot due to a lack of adequate transmission fluid cooling. Overheating can cause premature transmission failure. If the transmission overheats, the transmission module detects this condition and puts the vehicle in fail-safe mode. Fail-safe mode limits engine RPMs and speed to prevent further transmission damage.

### Troubleshooting Nissan Transmission Problems | YOUCANIC

While your Nissan transmission fluid color will always be red, the color of your transmission fluid will depend on its age. When transmission fluid is brand-new, it will be an unmistakable dark red. As you drive around Glenn Allen, it will turn to a burnt, rusty color and then eventually turn black if you don't change it.

### How to Check Your Nissan Transmission Fluid | Nissan of ...

The required fluid for all XTRONIC CVT-equipped Nissan models is Nissan CVT Fluid NS-3. Do not use Automatic transmission fluid (ATF), Manual transmission fluid, or mix this fluid with other fluids, as it may damage the CVT transmission and void the warranty.
