Why do the virus and the disease have different names? Viruses, and the diseases they cause, often have different names. For example, HIV is the virus that causes AIDS. People often know the name of a disease, but not the name of the virus that causes it. There are different processes, and purposes, for naming viruses and diseases.

Naming the coronavirus disease (COVID-19) and the virus ...

3. The magistrate after due notice and a hearing, if satisfied that the complaint of the health officer is well founded and that the afflicted person is a source of danger to others, may commit the said person to any hospital or institution established for the care of persons suffering from any such communicable disease or maintaining a room, ward or wards for such persons.
